

Visit us at Productronica in München

2019年11月13日

Xyztec is exhibiting at the **Productronica** this week from November 12th till November 15th in München, Germany. At our booth in Hall A2.316 we present the **Sigma HF**, the world's biggest Bond Tester developed to test high forces and large areas.

Deformation analysis using Condor Sigma

In addition we demonstrate an image processing solution (**VEDDAC**) to analyze motions and strains through a special camera added on our **Sigma** combined with digital image recognition software. The VEDDAC tool can provide critical analysis and problem solving during the design engineering phase, in the failure analysis lab or even as a process monitor in production environments.

Productronica is the world's leading trade fair for electronics development and production with 1200 exhibitors and more than 44000 professional visitors. The expo provides a unique overview of the entire value chain for electronics. Highlights include the CEO Roundtable and the PCB & EMS Marketplace. With all that is not a surprise that Productronica 2019 Munich is considered a must-attend event by any company in the electronics industry.

We look forward to seeing you at our booth!
