

Your sample fits, too!

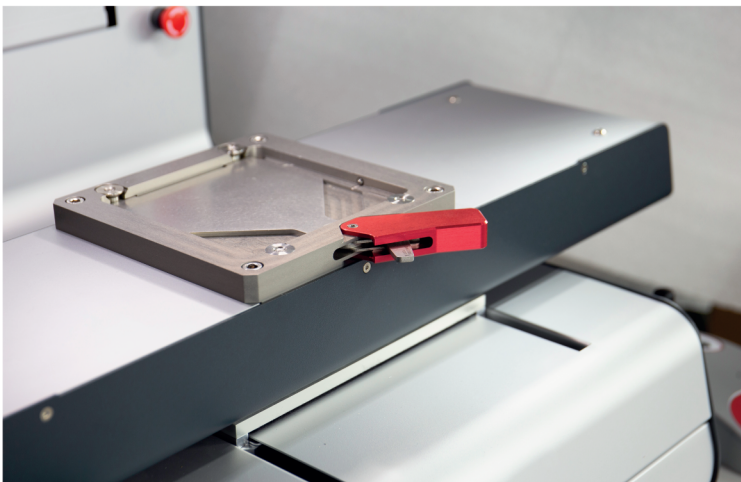

Stages

High-speed bond testing maximizes your units per hour (UPH). The standard Sigma* comes with a high axis speed of 50 mm/s, direct-drive motor, and mapped linear positional encoders to ensure very accurate positioning.

**Floor-based Sigmas come with high speed axis of 500 mm/s and 10 nm encoders.*

Work holders

- Accurate alignment
 - Perfect clamping solutions
 - Quick release
- Secure lock maintains reproducible positioning
 - Easy to change with quick release handles
 - Exchanging workholders is a very fast procedure

Besides customization, we have a wide selection work holders available.
